### Overview:

Advance of information and communication technologies has been brought tremendous benefits to us. Various kinds of information are available on the Web and the amount of data is growing very rapidly. Above all, there has been rapid and remarkable progress in the field of Social Network Service (SNS) such as Twitter, Instagram, and Facebook. It is becoming very difficult to manage such data for computer systems and human beings. This special session focuses on information, systems, and humans on the web. It aims to clarify the relations and interactions among them through analysis and evaluation, and to find better system behaviors and human actions for increasing the benefits of web information.
